Typescript, Javascript, React JS, CSS3, HTML5, Express, Git, Github, Node, MongoDB, Postman, IDE: VS Code

## PROJECTS

**Cocktail Helper**                                                                                                   [View Project](View Project)
**React JS | React Router | CSS | 3rd Party APIs - Axios**
- Focused on current Router URL management and the fetching of different API responses throughout multiple components.
- With the use of a 3rd party API - Cocktail Helper gives its user a display of drinks and the ability to retrieve a randomized option, which carries information of whichever cocktails they would like to know more about.

**Crypto Tracker**                                                                                                   [View Project](View Project)
**React JS | HTML | CSS | 3rd Party APIs - Axios | TypeScript**
- Using a 3rd party API - Crypto Tracker allows users to retrieve information, such as the market cap and market volume, from a wide range of cryptocurrency.
- A TypeScript structured project implemented with React JS for better code practices and management.

**LA Exotic Rides**                                                                                                   [View Project](View Project)
**React JS | React Router | CSS**
- Photo Library. Using React and CSS, a web app focused for car enthusiasts inside of Los Angeles.. This project is handled through React Hooks, React Routers, and Promises.

**Portfolio**                                                                                                   [View Project](View Project)
**JavaScript | HTML | CSS**

- Personal web application to showcase personality, skills, and an added medium for getting in contact.

## EDUCATION

- **California State University, Northridge** |B.A., 2020
