EDUCATION
Online Bootcamps:
The Web Developer Bootcamp
&
Modern React with Redux Bootcamp
Additional Ed.
California State Northridge University
Political Science BA

SKILLS
—
React, JavaScript, CSS, HTML

Experience

FRONT END DEVELOPER PROJECTS

I. Built A Responsive Community Web App.
Using **React** and **CSS**, I built a web app focused on car enthusiasts inside of Los Angeles. Submissions are filtered and categorized to fit their relevant car company. This project is handled through react Hooks, React Routers, and Promises.
https://lacarsblog.vercel.app/

II. Worked with **APIs** to create a responsive Web App. This web application is focused on entertainment for dog lovers. Allowing the user to generate a random dog with a name. Utilization of components for cleaner code is also used in this project surrounding the APIs.

Profile
Passionate Self-Taught Front End Web Developer using HTML5, CSS, JavaScript and React to

build responsive web applications and dynamic user interface. Seeking a position as a Jr Front End Developer

where I can utilize my skills and previous experience in front end development.

The advantage that I have is the passion and self-motivation that I bring into this field. I do not have a traditional CS degree

and I did not graduate from a bootcamp, but I do have information and natural inclination to learn beyond most, because I am self-taught, I believe it shows that I desire to continually learn more.
